

Cosumnes River College
CISS 301
Ethical Hacking
A Hybrid-Online Course
Summer 2009

Instructor: Buddy Spisak

Office Hours: Mon. 6:30-7:40 p.m. (Jun. 8 to Jul. 20)

Office: BS-143

Voice Mail: (916) 568-3100 ext. 14162 or (800) 486-8156 ext. 14162

Email: spisakj@crc.losrios.edu The turnaround time for responding to most emails is about one to two days. Be sure to include your name and the course number in each email so I can identify who you are and what the email is about.

Course Web page: <https://d2l.losrios.edu/>

Instructor Web page: <http://crc.losrios.edu/spisakj/>

Microsoft Messenger: You can also add me to your contact list for Windows Messenger. You can use my email address to find me.

Prerequisites: None

Advisory: CISC 323, CISC 356, and CISS 300

Lecture: Online

Lab: W 6:00 to 9:10 p.m.

Accepted for Credit: CSU

Class Credits: 2 units

Required Textbooks:

Title: *Hands-On Ethical Hacking and Network Defense*

Author: Michael T. Simpson

Publishing Info: Thompson Course Technology, 2006

ISBN10: 0-619-21708-1

ISBN13: 978-0-619-21708-2

Optional Materials: 3-1/2" floppies or a flash drive to store your work for the class

Course Description:

With the threats of cyber-terrorism and corporate espionage increasing, the need for trained network security professionals continues to grow. This course covers penetration-testing tools and techniques that White Hat Hackers and security testers use to protect computer networks. This course provides a structured knowledge base for preparing security professionals to discover vulnerabilities and recommend solutions for tightening network security and protecting data from potential attackers. The issue of ethics is also discussed.

Student Learning Outcomes and Course Objectives:

As a result of completing this course, you will be able to:

- SLO #01: UNDERSTAND ETHICAL HACKING CONCEPTS, INCLUDING THE TERM "ETHICAL HACKER," AS WELL AS PENETRATION AND SECURITY TESTING CONCEPTS AND THE DIFFERENCES BETWEEN THEM
 - Describe the role of an ethical hacker
 - Differentiate between what you can or cannot do legally as an ethical hacker

- SLO #02: DESCRIBE MAJOR CONCEPTS AND ASPECTS OF THE TCP/IP PROTOCOL SUITE, INCLUDING EACH OF THE FOUR LAYERS OF THE PROTOCOL STACK: APPLICATION, TRANSPORT, INTERNET, AND NETWORK
 - Describe the TCP/IP protocol stack and be able to review the addressing schemes and how they relate to TCP/IP protocol and security
 - Explain the basic concepts of IP addressing
 - Explain the binary, octal, and hexadecimal numbering systems
- SLO #03: CATEGORIZE THE DIFFERENT TYPES OF MALICIOUS SOFTWARE AND THEIR EFFECT ON SOFTWARE OR HARDWARE
 - Critique the physical security attacks and their vulnerabilities
 - Describe the different types of malicious software
 - Classify the different methods of protecting against malware attacks
 - Evaluate the different types of network attacks and how they can be prevented
- SLO #04: EVALUATE THE VARIOUS TOOLS USED FOR PORT SCANNING
 - Research the different types of port scans currently being used, the tools available to most hackers, the tools' purpose and function
 - Reason what ping sweeps are used for
 - Uncover how shell scripting is used to automate security tasks
- SLO #05: ANALYZE SEVERAL NETWORK SECURITY DEVICES THAT SECURITY PROFESSIONALS AND NETWORK ADMINISTRATORS CAN USE TO BETTER PROTECT THEIR NETWORKS
 - Critique the advantages and disadvantages of different Intrusion Detection (IDS) technology currently available
 - Critique the advantages and disadvantages of different software firewall technology currently available
 - Investigate honeypots, their purpose and usefulness in a network security plan

Methods of Measuring Student Learning Outcomes:

- You will demonstrate knowledge of network and Internet security applications and standards through class discussions and achievement on quizzes and final examination.
- You will demonstrate competence in the coursework by completing lab work and participating in discussions during the semester.

Student Obligations:

- **Attendance:** Since this course is online, only attendance at the Final on July 29, 2009 is necessary. There will be weekly lab time on campus, and it is up to you to complete the lab assignments during the lab time or at home.
- **Late Work:** Unless noted all assignments are due on Tuesday by midnight each week. Late work will be accepted ONLY if you have contacted me prior to the due date either by email or voice mail. In general, late work is due the next week, and no late assignments may be turned in after one week from the original due date, regardless of the reason. For every day an assignment is late, you will lose 10% of its grade.
- **Due Dates:** Unless noted, all assignments will be submitted in Desire 2 Learn (d2l) under the "Dropbox" link. If, for any reason, you cannot access d2l or are unable to submit the assignment on time, please email it to me instead so that you are not penalized for being late. Quizzes cannot be taken, nor can discussion items be completed after their due dates. If you miss a quiz and you want to make up points, you can take advantage of the extra credit assignments posted in d2l. Everyone is welcome to work on the extra credit assignments. Typically, they are five to ten points each, depending on the difficulty of the assignment.
- **Labs:** There will be six labs credited for homework for the class. The labs will consist of a combination of end-of-chapter review questions, case studies, and activities. The due dates are located in the **SCHEDULE** portion of this handout. We will spend a good deal of time working on lab activities. Each lab has a set of review questions that you will need to answer in d2l in

order to receive points for that assignment. If you do the lab work at the college during the regularly scheduled lab time, you will not have to submit your results in d2l. Instead, I will visually confirm your work and assign your points in class.

- **Discussions:** I want everyone to take a pro-active approach to learning this material. This includes using the Discussions link to ask questions and also answer other students' questions. I will also post questions each week that you can answer to further your understanding of the material. I expect two postings each week unless otherwise noted.
- **Final Exam:** The final exam will consist of two parts. One part of the exam will be a hands-on practical demonstration of assigned tasks, and the other part will be an exam taken in d2l.
- **Plagiarism Policy:** It is inappropriate, and a violation of academic policy, to copy information from any source (including, but not limited to, textbooks, magazine articles, newspaper articles and Internet articles) without giving proper credit to the author by using standard quotation procedures such as in-line quotes, footnotes, endnotes, etc. Quotes may not exceed 25% of the assignment's total length. You will receive no credit (0 points) for any assignment that copies any material from any other source without giving proper credit to the author(s). Repeat offenders of this policy are subject to academic discipline as outlined in the policies published by the college.
- **Cheating:** Students who cheat will receive a failing grade for the course. (See CRC 2009-10 College Catalog, p. 34 or the Student Behavior and Academic Integrity page of the college website (http://www.crc.losrios.edu/College_Catalog/General_Information/Student_Behavior_and_Academic_Integrity.htm).
- **CRC Honor Code:** Academic integrity requires honesty, fairness, respect and responsibility. (See CRC Class Schedule Summer/Fall 2009, p. 27 or the Cosumnes River College Honor Code posted on the college website (<http://www.crc.losrios.edu/documents/resourceguide/CRC-HonorCodeForm.pdf>).
- **Email:** Every student will be required to have an email account. If you do not have an email account, the college provides free email accounts for all current students. To activate your account, go to <https://imail.losrios.edu/> and follow the directions provided.
- **Email etiquette:** I will not tolerate rude and demeaning comments or emails to anyone in this class. Please keep your comments and emails topic-related. If I determine that a comment or email to anyone else in the class is rude or demeaning, I will warn you once. If your behavior continues to be unacceptable, I will refer you to the administration of the college for disciplinary action.
- **Personal belongings:** No food or drinks are allowed in the classroom. All cell phones, beepers, pagers, etc. should be turned off or set to vibrate.
- **Disabilities:** If you have a documented disability and wish to discuss academic accommodations, please contact me after class or contact the Office of Disabled Student Programs and Services at 691-7275 as soon as possible.
- **Campus Police:** You can call 691-7777 to request a safety escort.
- **Desire 2 Learn (d2l):** This class utilizes a product called "Desire 2 Learn." It is highly recommended that you check the website frequently for scheduling updates and homework assignments. Most of the homework assignments and quizzes will be done on d2l.
- **Online Course Responsibilities:** This course requires significant self-motivation. You must not get behind. Labs and weekly assignments can take up to eight hours to finish. Please don't try to finish them in one day. Not all activities are created equal. Some may take a bit longer than others. You would normally spend 4 hours per week in class for this course, a total of 54 hours. Allow yourself at least 8 hours per week to complete the activities online, including the time spent writing for the postings to the discussions page. You should plan additional time to read the textbook and study for the quizzes. Some people believe that an online framework provides a much easier way to study this subject than an on-campus framework because they love to read and avoid the parking problems. Others feel very intimidated at first. Be patient as you work your way through the activities.

Grading:

Course Topic	Points	Total	Approximate % the of Grade
Labs (6)	50	300	40
Orientation Quiz (1)	10	10	1
Quizzes (4)	30	120	16
Discussions (6)	20	120	16
Final Exam (1)	200	200	27

Point System:

There are 750 total assigned points.

Grade Ranges:

A= 675-750, B=600-674, C=525-599, D=450-524, F=0-449

Schedule: It is tentative and can change during the course of the term. All changes will be located under the "News" section in d2l for the course.

	Day:		Lecture/Lab Schedule:	Assignment Due:	Due Date (By Midnight):
Week 1	Wed.	6/10	Orientation and Introductions	Orientation Discussion Orientation Quiz	Tues., Jun. 16
			Ch 1: Ethical Hacking Overview	View the Online Orientation	
			Ch 2: TCP/IP Concepts Review		
			Lab #1:		
Week 2	Wed.	6/17	Ch 3: Network and Computer Attacks	Discussion #1 (Ch 1-2)	Tues., Jun. 23
			Ch 4: Footprinting and Social Engineering	Lab Review #1	
			Lab #2		
Week 3	Wed.	6/24	Ch 5: Port Scanning	Discussion #2 (Ch 3-4)	Tues., Jun. 30
			Ch 6: Enumeration	Quiz#1(Ch 1-3)	
			Lab #3:	Lab Review #2	
Week 4	Wed.	7/1	Ch7: Programming for Security Professionals	Discussion #3 (Ch 5-6)	Tues., Jul. 7
			Ch8: Microsoft Operating System Vulnerabilities	Quiz#2(Ch 4-6)	
			Lab #4:	Lab Review #3	
Week 5	Wed.	7/8	Ch 9: Linux Operating System Vulnerabilities	Discussion #4 (Ch 7-8)	Tues., Jul. 14
			Ch 10: Hacking Web Servers	Lab Review #4	
			Lab #5:		
Week 6	Wed.	7/15	Ch 11: Hacking Wireless Networks	Discussion #5 (Ch 9-10)	Tues., Jul. 21
			Ch 12: Cryptography	Quiz#3(Ch7-9)	
			Lab #6:	Lab Review #5	
Week 7	Wed.	7/22	Ch 13: Protecting Networks with Security Devices	Discussion #6 (Ch11-12)	Tues., Jul. 28
			Lab #7:	Quiz#4(Ch10-12)	
				Lab Review #6	
Week 8	Wed.	7/29	Final Exam		All work needs to be turned in.
